AutoPlex™ Mixer & Delivery System

Step-by-Step User Guide

Stryker AutoPlex is designed to be used in conjunction with Stryker VertaPlex bone cement and VertePort needles.

NOTE:
DO NOT press blue start button until ready to begin mixing cement
DO NOT remove injector from base or rotate injection handle before mixing cement

CAUTION:
Modification of cement is not recommended and may lead to device malfunction

Step 1
Attach extension tube to delivery cartridge

Step 2
Add powder through supplied funnel

Step 3
Add liquid monomer

Step 4
Lock lid onto mixing chamber; turn until you hear audible click

Step 5
Press and release mixing button

Step 6
Remove tube from cement injector when mixing and transfer is complete—1/4 turn counterclockwise

Step 7
Remove cement injector from mixing unit and prime as needed

Step 8
Attach distal luer connection to a VertePort® coaxial delivery system or directly to an access needle in the patient

Step 9
Slowly turn the injection handle clockwise to advance cement under live fluoroscopy
